

Since 2003, the non-profit Chemical Educational Foundation (<http://www.chemed.org>) has promoted and fostered the education of our youth in the science of chemistry. Each and every year, the CEF has held statewide and national chemistry challenges in the spring. California's participation began nine years ago, and with your support the contest has continued to grow. Once again, the **Discovery Cube Orange County** will serve as the venue for the CA State Challenge on **April 29, 2018**. Students in grades 5-8 will compete for a chance earn a trip to the National **You Be The Chemist Challenge** held in Washington D.C. next June.

In order to build upon the success of 2017's YBTC California Challenge, we need your help! The support of our industry and the individuals who work within it are vital to this effort. This program is a natural fit for companies wishing to satisfy their community outreach needs. Together we can build a greater understanding, appreciation, and love for chemistry. **These students are the future of our industry.** Please help us by investing in our collective future to ensure we all share in a brighter tomorrow.

With each level of sponsorship, there will be opportunities to have your company's name and logo prominently displayed throughout the competition. All sponsorship donations are tax deductible as they are made to The Chemical Educational Foundation, a 501(c) (3) organization.

Help us assist California students showcasing their knowledge of chemistry to the world. Show your commitment to education by supporting our **You Be The Chemist Challenge** in California.

Thank you for your support!
