

Air Liquide Advanced Materials Seeking Manager - HSES Operations, Fremont,CA

Requisition Number: [8688](#)

Job Title: Manager - HSES Operations

Area of Interest: Health, Safety, Environment & Quality Engineering

Location: Fremont, California

Job Description: Air Liquide Advanced Materials (ALAM) grows by enabling our customers to innovate. Our ALOHATM and Voltaix® products are critical to the manufacture of the newest computer chips required for Big Data and the Internet of Things. To enhance our execution from discovery to delivery ("lab-to-fab"), we are adding talented people to our team.

The role of Manager - HSES Operations requires a highly motivated, people-oriented person for the proactive, practical application of HSES commitments to the operation and to the day-to-day behaviors of all employees. This individual will provide leadership in developing, implementing, improving and managing HSES policies, procedures, practices, and projects including nourishing a culture in which HSES is the highest priority. Individual leads HSES Technicians in one or more manufacturing locations to meet ALAM's HSES objectives.

Job Responsibilities include:

- Provides technical support for on-going HSES projects, problem solving, investigations including site inspections and audits, and activities;
- Assist in developing an effective HSES communication process to make HSES priorities and performance visible;
- Partners with Operations, R&D, Engineering, etc. to ensure safe and compliant ALAM operations;
- [More](#) . . .

Required Qualifications include:

- Bachelor's Degree in Engineering, Chemistry, Environmental or Occupational Safety
- 5+ years of applicable HSES work experience in chemical manufacturing or high-hazard environment
- Passion for HSES as demonstrated by a strong commitment
- [More](#) . . .

Preferred Qualifications:

- Training and certifications in OSHA, DOT, DHS and RCRA
- [More](#) . . .
